

## Priority Bible Studies Video Room FAQ

**Priority Bible Studies Video Room provides each Bible study lesson in the following formats:**

- Online streaming video can be watched directly on the webpage.
- [Windows Media Player](#) format (WMV video file)
- Apple [QuickTime](#) Player format (MOV video file)
- iPod/iPhone format (M4V video file)
- Audio-only format (MP3 audio file)

**Should I download the free files from the Video Room or purchase CDs/DVDs?**

These free digital downloads are intended for personal use and not intended for display on a larger screen. All of our videos are available in high resolution DVD format and can be purchased in our online store.

**How do I download a file?**

Downloading files requires a broadband internet connection such as cable, DSL or speed equivalent.

Use your mouse to right-click on the file you want to download, then click “Save Target As” (Internet Explorer) or “Save Link As” (Mozilla Firefox). Proceed as you normally would to save a file to a folder on your computer.

**What software do I need to play these files?**

WMV video files play best on [Windows Media Player](#), but will play on other media players as well. The Macintosh OS does not natively support the WMV format, but there is a “[Mac Version](#)” of Windows Media Player.

MOV video files play best on Apple’s [Quicktime](#) Media Player, but will play on other media players as well.

M4V video files are intended for use on iPods, iPhones, and iTunes.

MP3 files (audio-only) will play on almost any audio player.
